Professional Experience

Software Engineer, *Tamkeen Technologies*

12/2024

Riyadh, Saudi Arabia

- Designed and delivered Oracle APEX dashboards and enterprise applications used by internal stakeholders to improve data visibility and decision-making.
- Customized and supported ERPNext modules for internal projects, contributing to improved system adoption and process efficiency.
- Leading internal system integrations using n8n, automating cross-platform workflows and reducing manual operational effort.

Software Engineer (OJT), *Tamkeen Technologies*

06/2024 – 12/2024

Riyadh, Saudi Arabia

- Vendor Portal Development: Designed and developed a vendor portal using OutSystems, including building a custom package to consume ERP APIs and creating a database for the application.
- CMS Application Development: Developed a Content Management System (CMS) application to deliver APIs for frontend development, enabling efficient and dynamic frontend integration using Oracle Apex.

Internship, *General Accountability Bureau*

12/2022 – 06/2023

Riyadh, Saudi Arabia

- Developed a website using ASP.NET Core, utilizing Razor Pages and MVC frameworks.
- Created and managed a MySQL database using PHP, including table creation, data insertion, and retrieval.
